PROFILE

Dynamic IT Professional with over 5+ years of experience in the banking sector, specializing in Cards and Payments. Proven expertise in SWIFT and ISO20022, with a deep understanding of banking products and payment systems. Certified Product Owner with a strong track record in managing and delivering high-impact solutions. Adept at leveraging industry knowledge to drive product innovation and optimize payment processes. Committed to contributing valuable insights and technical expertise to enhance organizational growth and efficiency.

EMPLOYMENT HISTORY

❖ **Product Manager- Senior Associate, The MathCompany** Sep 2022 — Jun 2023
Bangalore

Project Overview:

As a key member of the product team at The Math Company, I led initiatives to advance Co.dx, an Advanced Business Intelligence Low Code Platform, with a specific focus on banking and financial services. My responsibilities included enhancing the platform's UI/UX, feature functionalities, and capabilities to support banking operations and regulatory compliance with minimal coding efforts.

Key Responsibilities:

- Collected and analyzed requirements from banking stakeholders, ensuring alignment with the product's strategic goals. Oversaw the creation of critical documentation (BRD, FRD, PRD, User Stories) for product development and compliance with financial regulations.
- Managed and mentored a 15-member team, driving exceptional results and promoting a culture of excellence. Collaborated with cross-functional teams to improve delivery practices, achieving a 15% reduction in development cycles.
- Coordinated with sales, onboarding, marketing, and support teams to ensure successful product launches, with a focus on banking solutions and integration.

Achievements:

- Developed banking-specific MVPs within Co.dx using Python and ML models, including features tailored for financial data analysis and regulatory reporting.
- Created a comprehensive Payment Analytics Platform, providing in-depth insights into transaction patterns, fraud detection, and financial performance metrics relevant to banking institutions.
- Implemented advanced financial analytical solutions and developed a Named Entity Recognition (NER)-based Insight Chatbot for enhanced banking data analysis and customer support.
- Efficiently managed product release plans and backlogs in JIRA, resulting in a 10% improvement in team productivity.
- Led the development of banking-centric features such as transaction analytics dashboards and fraud detection tools, ensuring compliance with industry standards and regulations.

❖ **Product Manager- Senior Analyst, FIS Global** Apr 2021 — Sep 2022
Chennai

Project Overview:

As a Product Manager for SecurLOCK Equip, a Retail Banking fraud management product, I oversaw the entire project life cycle, from inception to completion. This involved coordinating with cross-functional teams including Development and Testing, ensuring seamless implementation of project objectives.

Key Responsibilities:

- Coordinated efforts between Development, Testing, and other relevant teams to ensure smooth project execution.
- Implemented agile processes to streamline project workflows, resulting in a notable 25% reduction in project overheads and a 15% increase in project throughput.
- Provided assistance to customers regarding product inquiries, offering comprehensive information on product features and benefits related to Fraud & Credit Risk mitigation.
- Collaborated closely with product and engineering teams to identify areas for product enhancement based on customer feedback, ensuring continuous improvement.

Achievements:

- Successfully enhanced product knowledge and delivered tailored product recommendations to customers, contributing to a significant 15% increase in sales.
- Played a pivotal role in driving improvements in project efficiency and customer satisfaction, leading to measurable enhancements in both project outcomes and customer engagement.

❖ **Software Engineer, Hexaware Technologies**

Feb 2018 — Nov 2020
Chennai

Project Overview:

As an APM at CITI bank Global, I led initiatives within the Commercial Cards-Payments domain, focusing on optimizing the Card Life Cycle, enhancing Credit Risk management, and integrating payment functionalities into the CitiManager application. My responsibilities also included overseeing compliance with SWIFT Messages, SEPA standards, and streamlining the Customer Onboarding Process.

Key Responsibilities:

- Collaborated cross-functionally to prioritize product features aligning with customer needs and business objectives, ensuring maximum value delivery.
- Applied practical knowledge of KYC data collection procedures to enhance customer onboarding processes and ensure regulatory compliance.
- Managed sprint backlogs, conducted sprint reviews, and participated in daily stand-ups, ensuring efficient development processes and timely delivery.
- Developed and maintained regression tests to uphold product quality standards, enhancing user satisfaction and reliability.
- Orchestrated user acceptance testing sessions to validate product functionality and gather actionable feedback for continuous improvement.

Achievements:

- Successfully implemented many solutions within CitiManager, optimizing operational efficiency and user experience.
- Spearheaded the development of statistical analysis models in the Advanced Fraud Early Warning System, contributing to proactive fraud mitigation strategies.
- Enhanced the Customer Onboarding Process, streamlining procedures and ensuring compliance with regulatory standards.
- Established robust regression testing procedures, ensuring consistent product quality and reliability with each software release.
